

USE TEACHING ASSISTANT FOR AUTOMATED TEST MARKING

THE HYPAS™ APPLICATION TO IMPROVE THE EFFICIENCY OF TEST WORKFLOWS

It's not just teachers that can benefit from Teaching Assistant. Any organisation that uses multiple choice question and answer sheets face the challenge of marking and recording results efficiently and accurately. Teaching Assistant is suitable for analysing quizzes, surveys, test papers, in fact any multiple choice document. Simply use the application to create a bubble sheet on the MFP that corresponds to the number of questions

and possible answers in the document. To mark the papers, a key bubble sheet is prepared with the correct answers marked up and then scanned into the machine. The completed survey or test sheets are then scanned in and compared with the key sheet. This results in accurate marking that can save many hours and eliminate errors. Comprehensive test reports can also be generated and saved to USB or email.

CHALLENGES

- Marking multiple choice questions takes a lot of time – **How can I make it faster?**
- Mistakes are easily made when marking test or quiz papers – **How can I make sure that all my test reports are accurate?**
- It is difficult to collect all data and to compile reports and statistics – **Is there an easier way?**

YOUR ADVANTAGES WITH TEACHING ASSISTANT

- With **Teaching Assistant**, the MFP will automatically mark all papers for you in a few seconds.
- **Teaching Assistant** eliminates human error and returns error-free test results.
- **Teaching Assistant** automatically compiles comprehensive reports and statistics that are ready to use.

FEATURES & SPECIFICATIONS

Teaching Assistant streamlines the task of printing, marking and analysing multiple-choice tests using popular bubble-sheet forms. All you have to enter into the device is the amount of questions, possible answers and sheets you need. To mark the test, simply fill out the key sheet marked with the bar code label and scan it in before entering the participants' answer sheets. The MFP will then be able to assess the test according to your answers automatically – the various results charts can be printed, sent to your email address, exported as a CSV file or saved on a USB stick. The whole process can of course be managed directly from the MFP's intuitive and easy to use touch screen menu.

Set up and print tests: Create tests directly on the device and print them out in one step, without the need of expensive pre-printed media.

Automated marking: Scan the forms and the completed answer key sheet to receive the individual marking for each participant.

Test reportings: Get a summary and detailed report of the test, including bar graphs, histograms and test statistics with just one click.

HYPAS™ – TAILOR-MAKE YOUR MFP TO SUIT YOUR BUSINESS

HyPAS™

HyPAS™ is UTAX's platform to develop custom MFP business applications. These can run embedded inside the device and extend the device functionality according to user needs. For powerful functionality, MFP applications can connect to external server applications and integrate the MFP into company workflows. With HyPAS™, we can meet individual customer requirements and provide the right solution for your business.

Via USB or e-mail: Choose whether you want to print results and reports, save to USB flash drive or e-mail them directly.

Keep data secure: To protect participant confidentiality, all data related to the test is automatically cleared from the device after the user exits Teaching Assistant.

No PC required: The application is completely device based and doesn't rely on an external PC.

BUBBLE-SHEET

A bubble-sheet is a standardised answer sheet used for multiple-choice tests. Each line corresponds to a question (1, 2, 3...) and each row to a possible answer (a, b, c or d). All your participants have to do is mark the circle that stands for the correct answer.
