

# MULTITASKING AT ITS FINEST.

Flexible A3 colour multifunctional systems are at the top of the wish list in many modern offices and need to satisfy as many different user requirements as possible. This means that a high level of user-friendliness is essential. The UTAX 2506ci and 3206ci multifunctional systems have been specifically developed to meet these requirements. Alongside their routine tasks, the systems also manage more complex tasks without any trouble, for example, thanks to the 270-sheet dual scan original feeder\* for fast scanning in a single operation and gentle handling of original documents. The systems conserve resources at the same time by allowing blank pages to be automatically filtered out during scanning and copying. The high print resolution of 1,200 dpi at full system speed also speaks for itself.

### HIGHLIGHTS:

**Unbelievable flexibility:** You can process up to 7,150 sheets from six paper feeds\* for various media. Paper formats from A6R to SRA3, paper weights from 52 to 300 g/m<sup>2</sup> and even tab sheets are readily fed from the paper cassettes. Papers of up to 256 g/m<sup>2</sup> can also be processed in duplex printing and used as cover sheets, for example. The innovative soft close feature of our paper cassettes guarantees that paper can be added with minimal sound. Do you need different finishing options? We can offer you these! Everything is possible: from the space-saving internal finisher with 50-sheet stapling to a brochure finisher that also creates tri-folding for letters in addition to brochures with up to 64 A4 or A5 pages. In addition, all finishers can be equipped with a punch unit.

**Simplest operation:** The menus of the large 9-inch colour touch display (picture diagonal: 22.86 cm) are intuitive to use. You can access the home menu at all times via the home button plus you can adapt this menu to suit your personal needs. The HyPAS interface allows you to easily integrate software solutions\* to optimise your specific processes. The systems also feature an NFC interface for direct printing from an Android smartphone or tablet\*. Now there's nothing more standing in the way of mobility.

**Professional printing:** The 1,200 dpi resolution, newly developed toner, printing in SRA3 format and the option to process different paper thicknesses allow you to create highly professional documents in brilliant colour quality. The versatile printer driver and the optional Fiery® Controller available for the 3206ci system also offer various options for optimising colour reproduction.

**Maximum security:** The 'Private Printing' function ensures that print jobs can only be started directly on the system by authorised persons. This means that confidential documents actually remain confidential. The optional 'Data Security Kit' allows you to increase security even further. Data on your hard disk is encrypted and securely deleted when it is no longer needed.
